# AESTHETIC BROCHURE

MADE IN ITALY

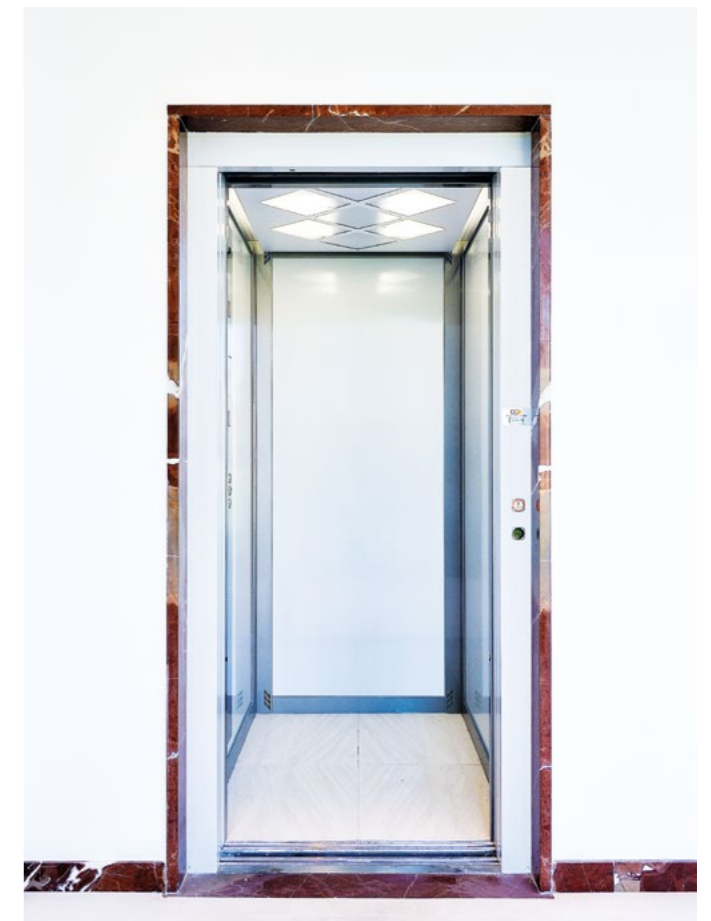

## ANOTHER DEFINITION OF THE PERFECT

As a spectacular combination of the cutting-edge hydraulic technology and the prominent Italian aesthetics, EP lives up to every strict standard of European Engineering in particular and of the world's lift in general.

As luxurious and elegant as a lotus, EP embodies the summit of the noble art as well as the advanced lift manufacturing. You will find another definition of the Perfect when it comes to EP.

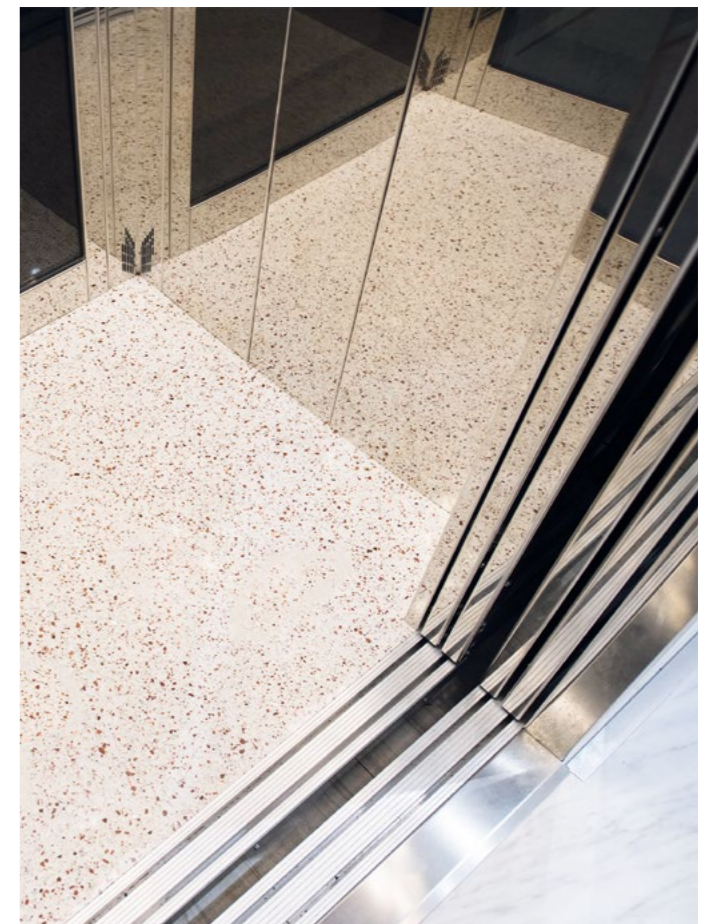

## FIRST CLASS PRODUCTS

All of our components and materials of EP are carefully selected to ensure natural resources are used in a manner which does not adversely affect the environment.

All supplier-side items used in our production methodology are selected using strict criteria.

## BRILLIANCE

EP offers beautiful stainless steel, aluminum, glass, real wood veneer laminate; high gloss lacquered finishes, etc.

And, our artistic nature, creativity and vast experience in using these materials give our lifts an unrivalled depth and uniformity to them. A thorough understanding of the materials we use in our production methods and a keen eye for detail ensures the material attributes are as uniformed as possible, as we use very strict criteria in the selection process of our materials.

The color, grain and moisture content of the wood must meet the very stringent quality standards required for EP in order to make it to the production process.
